

阿尔柯特（北京）清洗设备有限公司
JmaKT (Beijing) Cleaning Equipment Ltd.

A Story of Reliability

Case 3

Unit of use: Zhongyuan Oilfield Production Plant

Use time: 2005

Purchasing equipment: hot and cold water washing machine (JM5305E)

Project use: cleaning the inner and outer walls of the oil pipe

The actual effect: it takes about 3 minutes to clean a oil pipe, and the inner and outer walls basically see the original color, and the effect is better. This model is suitable for small-scale tubing plants and oil production operations.

Project evaluation: Tubing cleaning is one of the jobs of any oil production plant. There are only two ways of automatic cleaning and manual cleaning. We are the latter. The characteristics are: small investment, portability, strong mobility, and multi-purpose. The inner and outer walls of the tubing can be cleaned, and the cleaning of various types of equipment can be cleaned, which is suitable for cleaning in various occasions.
